ABOUT US

we are a team of architects and designers creating objects for the home based on patterns and phenomena that we find in nature & mathematics.

we carefully engineer responsible and direct supply chains. sustainably sourced materials, recycled packaging and community focused manufacturing are deeply integrated into our business model.

you can find our work in the world's best curated boutiques and museum stores from new york to tokyo, as well as our studio showroom in central berlin.

FAMILY RUN WORKSHOPS

are integrated into our design process from the start, making sure we get the best out of the materials and crafts we work with.

we are always thinking about how to make our pieces better, with less waste and more care.

below a muse vase being re-formed by hand after being removed from the mould in our bohemian glassworks. This means that every muse vase is quite unique.

HAND CUT CRYSTAL

although our crystal always makes a futuristic statement, it takes hundreds of years of tradition to hand cut the glass.

it takes many stages of cutting, sanding, polishing and buffing to achieve the hard, brilliant sheen that breaks the light just so, the way only the highest quality crystal can.

PACKAGED WITH CARE

we work hard to put as little plastic into our packaging as we can, and that our products still arrive safely and make a great impression.

the lebenswerk-gemeinschaft workshops for the disabled here in berlin finish and package our products. the extra effort required to go (virtually) plastic free is carried out within the local community.
